

Default Results Engine Score Settings

The Results Engine is a powerful automation feature in Learnexify. It monitors student grades and automatically triggers actions based on the scores achieved. For example, it can automatically mark a student as "Passed" or "Certified" the moment their grade falls into a specific range defined here.

By setting these defaults at the administrator level, you create a "baseline" for the entire platform. Instead of manually typing grade ranges for every single course, the system will pull these standard categories automatically, ensuring consistency across all departments and programs.

Results Engine automates actions based on student grade ranges.

To define your global scoring categories, follow these steps:

- Log in to your **Learnexify Dashboard**.
- Open the **Side Drawer** menu on the left.
- Click on the **Admin** section.
- Select **Default Results Engine Score Settings**.

Range 1: Min Max Name 

Add new score range

Save changes

On this page, you will see a list of rows where you can define your grading brackets. Each category requires three specific pieces of information:

- Min (Minimum): The lowest score required to enter this category (e.g., 50).
- Max (Maximum): The highest score allowed in this category (e.g., 79).
- Name: The label that describes this performance level. This name will appear in reports and automated notifications.

Practical Example:

Min	Max	Name
80	100	Distinction / High Achiever
50	79	Pass
0	49	Remediation Required

Managing the Scoring Table

The system is flexible, allowing you to add as many or as few categories as your institution requires.

- **Adding a Category:** Click the Add new score range button at the bottom of the list to generate a new empty row.
- **Removing a Category:** If you have an extra row or a category you no longer use, click the Red Minus (—) Icon next to that specific row to delete it
- **Sorting:** Ensure your ranges do not overlap (e.g., don't set one range as 50–70 and another as 60–80) to avoid automation errors.

Saving and Application

Once you have finished defining your standard scoring levels:

- Review the numbers and names for accuracy.
- Click the Save changes button at the bottom of the page.

Result: These categories are now saved as your system defaults. Whenever a teacher or admin enables the Results Engine for a specific course, these ranges will be ready to use immediately.
